

Revision date : 2016/05/04 Version: 3.0 Page: 1/10 (30500040/SDS\_CPA\_CA/EN)

## 1. Identification

Product identifier used on the label

# AVERT DRY FLOWABLE FORMULA 1

**Recommended use of the chemical and restriction on use** Recommended use\*: insecticide

\* The "Recommended use" identified for this product is provided solely to comply with a Federal requirement and is not part of the seller's published specification. The terms of this Safety Data Sheet (SDS) do not create or infer any warranty, express or implied, including by incorporation into or reference in the seller's sales agreement.

## Details of the supplier of the safety data sheet

<u>Company:</u> BASF Canada Inc. 100 Milverton Drive Mississauga, ON L5R 4H1, CANADA

Telephone: +1 289 360-1300

## **Emergency telephone number**

CANUTEC (reverse charges): (613) 996-6666 BASF HOTLINE: (800) 454-COPE (2673)

Other means of identification PCP # 28403 Synonyms: Abamectin B1

# 2. Hazards Identification

## According to Hazardous Products Regulations (HPR) (SOR/2015-17)

#### Label elements

The product does not require a hazard warning label in accordance with GHS criteria.

## Hazards not otherwise classified

Labeling of special preparations (GHS):

Revision date : 2016/05/04 Version: 3.0 Page: 2/10 (30500040/SDS\_CPA\_CA/EN)

This product is not combustible in the form in which it is shipped by the manufacturer, but may form a combustible dust through downstream activities (e.g. grinding, pulverizing) that reduce its particle size.

## According to Controlled Products Regulations (CPR) (SOR/88-66)

## **Emergency overview**

CAUTION: Eye irritant. Contains 1-(3-chloroallyl)-3,5,7-Triaza-1-Azoniaadamantane Chloride. KEEP OUT OF REACH OF CHILDREN. HARMFUL IF SWALLOWED. HARMFUL IF INHALED. HARMFUL IF ABSORBED THROUGH SKIN. Avoid contact with the skin, eyes and clothing. Do not breathe dust.

# 3. Composition / Information on Ingredients

## According to Hazardous Products Regulations (HPR) (SOR/2015-17)

CAS Number	
71751-41-2	
112945-52-5	

<u>Weight %</u> 0.05 % 1.0 - 5.0% <u>Chemical name</u> Abamectin Silica

# 4. First-Aid Measures

## Description of first aid measures

## General advice:

Remove contaminated clothing.

## If inhaled:

Keep patient calm, remove to fresh air.

## If on skin:

Wash thoroughly with soap and water.

#### If in eyes:

Wash affected eyes for at least 15 minutes under running water with eyelids held open.

## If swallowed:

Rinse mouth and then drink plenty of water.

# Most important symptoms and effects, both acute and delayed

Symptoms: No significant reaction of the human body to the product known.

## Indication of any immediate medical attention and special treatment needed

Note to physician Treatment:

Symptomatic treatment (decontamination, vital functions).

Revision date : 2016/05/04 Version: 3.0 Page: 3/10 (30500040/SDS\_CPA\_CA/EN)

# 5. Fire-Fighting Measures

## **Extinguishing media**

Suitable extinguishing media: water spray, dry powder, foam

Unsuitable extinguishing media for safety reasons: carbon dioxide

#### Special hazards arising from the substance or mixture

Hazards during fire-fighting: carbon monoxide, carbon dioxide, If product is heated above decomposition temperature, toxic vapours will be released. The substances/groups of substances mentioned can be released in case of fire.

### Advice for fire-fighters

Protective equipment for fire-fighting: Wear self-contained breathing apparatus and chemical-protective clothing.

#### Further information:

Keep containers cool by spraying with water if exposed to fire. In case of fire and/or explosion do not breathe fumes. Collect contaminated extinguishing water separately, do not allow to reach sewage or effluent systems. Dispose of fire debris and contaminated extinguishing water in accordance with official regulations.

## 6. Accidental release measures

#### Further accidental release measures:

Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). Avoid the formation and build-up of dust - danger of dust explosion. Dust in sufficient concentration can result in an explosive mixture in air. Handle to minimize dusting and eliminate open flame and other sources of ignition.

#### Personal precautions, protective equipment and emergency procedures

Use personal protective clothing. Avoid contact with the skin, eyes and clothing. Avoid dust formation.

#### **Environmental precautions**

Do not discharge into the subsoil/soil. Do not discharge into drains/surface waters/groundwater.

#### Methods and material for containment and cleaning up

For small amounts: Contain with dust binding material and dispose of. For large amounts: Sweep/shovel up.

Collect waste in suitable containers, which can be labeled and sealed. Clean contaminated floors and objects thoroughly with water and detergents, observing environmental regulations. Avoid raising dust. Dispose of absorbed material in accordance with regulations.

# 7. Handling and Storage

## Precautions for safe handling

Revision date : 2016/05/04 Version: 3.0

Page: 4/10 (30500040/SDS\_CPA\_CA/EN)

Ensure thorough ventilation of stores and work areas. When using do not eat, drink or smoke. Hands and/or face should be washed before breaks and at the end of the shift. No special measures necessary if stored and handled correctly.

Protection against fire and explosion:

Avoid dust formation. Prevent electrostatic charge - sources of ignition should be kept well clear - fire extinguishers should be kept handy. Dust can form an explosive mixture with air.

### Conditions for safe storage, including any incompatibilities

Segregate from foods and animal feeds.

Further information on storage conditions: Protect against moisture. Keep away from heat. Protect from direct sunlight.

Protect from temperatures above: 20 °C

Changes in the properties of the product may occur if substance/product is stored above indicated temperature for extended periods of time.

# 8. Exposure Controls/Personal Protection

Users of a pesticidal product should refer to the product label for personal protective equipment requirements.

#### Components with occupational exposure limits

Silica

OSHA PEL

TWA value 20 millions of particles per cubic foot of air ; TWA value 0.8 mg/m3 ; The exposure limit is calculated from the equation, 80/(%SiO2), using a value of 100% SiO2. Lower percentages of SiO2 will yield higher exposure limits.

#### Personal protective equipment

#### **Respiratory protection:**

Wear respiratory protection if ventilation is inadequate. Breathing protection if breathable aerosols/dust are formed.

#### Hand protection:

Chemical resistant protective gloves, Protective glove selection must be based on the user's assessment of the workplace hazards.

#### Eye protection:

Safety glasses with side-shields. Tightly fitting safety goggles (chemical goggles). Wear face shield if splashing hazard exists.

#### **Body protection:**

Body protection must be chosen depending on activity and possible exposure, e.g. head protection, apron, protective boots, chemical-protection suit.

## General safety and hygiene measures:

RECOMMENDATIONS FOR MANUFACTURING, COMMERCIAL BLENDING, AND PACKAGING WORKERS Wear long sleeved work shirt and long work pants in addition to other stated personal protective equipment. Work place should be equipped with a shower and an eye wash. Handle in accordance with good industrial hygiene and safety practice. Personal protective equipment should be decontaminated prior to reuse. Gloves must be inspected regularly and prior to each use.

Revision date : 2016/05/04 Version: 3.0

Page: 5/10 (30500040/SDS\_CPA\_CA/EN)

Replace if necessary (e.g. pinhole leaks). Take off immediately all contaminated clothing. Store work clothing separately. Hands and/or face should be washed before breaks and at the end of the shift. No eating, drinking, smoking or tobacco use at the place of work. Keep away from food, drink and animal feeding stuffs.

# 9. Physical and Chemical Properties

Form: Odour: Odour threshold: Colour: pH value: Melting point: Boiling point:	powder mild, of yeast Not determined due to potential health has brown approx. 4 - 6 ( 1 %(m), 20 °C) not applicable, The data refers to the carrier material. The product is a non-volatile solid.	zard by inhalation.
Flash point: Flammability:	not applicable not highly flammable	(Directive 84/449/EEC, A.10)
Lower explosion limit:	As a result of our experience with this product and our knowledge of its composition we do not expect any hazard as long as the product is used appropriately and in accordance with the intended use.	
Upper explosion limit:	As a result of our experience with this product and our knowledge of its composition we do not expect any hazard as long as the product is used appropriately and in accordance with the intended use.	
Bulk density:	approx. 619 kg/m3 ( 23 °C) Apparent density after tamping	
Vapour density: Self-ignition temperature:	not determined	
Thermal decomposition:	No decomposition if stored and handled as prescribed/indicated.	S
Solubility in water: Evaporation rate:	insoluble not applicable	

# **10. Stability and Reactivity**

#### Reactivity

No hazardous reactions if stored and handled as prescribed/indicated.

#### Oxidizing properties:

Based on its structural properties the product is not classified as oxidizing.

#### **Chemical stability**

The product is stable if stored and handled as prescribed/indicated.

#### Possibility of hazardous reactions

No hazardous reactions if stored and handled as prescribed/indicated.

Revision date : 2016/05/04 Version: 3.0

Page: 6/10 (30500040/SDS\_CPA\_CA/EN)

#### **Conditions to avoid**

Avoid all sources of ignition: heat, sparks, open flame. Avoid prolonged storage. Avoid electro-static discharge. Avoid contamination. Avoid prolonged exposure to extreme heat. Avoid extreme temperatures. This product may form an explosive mixture if: 1. the dust is suspended in the atmosphere as a dust cloud AND 2. the concentration of the dust is above the lower explosion limit (LEL) AND 3. the limiting oxygen concentration (LOC) is exceeded.

#### Incompatible materials

strong acids, strong bases, strong oxidizing agents

### Hazardous decomposition products

Decomposition products:

Hazardous decomposition products: No hazardous decomposition products if stored and handled as prescribed/indicated.

Thermal decomposition: No decomposition if stored and handled as prescribed/indicated.

# 11. Toxicological information

### Primary routes of exposure

Routes of entry for solids and liquids are ingestion and inhalation, but may include eye or skin contact. Routes of entry for gases include inhalation and eye contact. Skin contact may be a route of entry for liquefied gases.

## **Acute Toxicity/Effects**

Acute toxicity

Assessment of acute toxicity: Relatively nontoxic after single ingestion. Slightly toxic after short-term skin contact.

<u>Oral</u> Type of value: LD50 Species: rat (male/female) Value: > 5,000 mg/kg No mortality was observed.

Inhalation Type of value: LC50 Species: rat Value: > 5.0 mg/l (calculated) The product has not been tested. The statement has been derived from the properties of the individual components.

Type of value: ATE Value: > 5.0000 mg/l Determined for dust

Dermal Type of value: LD50 Species: rabbit (male/female) Value: > 2,000 mg/kg No mortality was observed.

Assessment other acute effects

Revision date : 2016/05/04 Version: 3.0

Page: 7/10 (30500040/SDS\_CPA\_CA/EN)

Assessment of STOT single: The available information is not sufficient for evaluation.

The product has not been tested. The statement has been derived from the properties of the individual components.

Irritation / corrosion

Assessment of irritating effects: May cause slight but temporary irritation to the eyes. Contact may result in skin irritation.

Skin Species: rabbit **Result: non-irritant** Method: Primary skin irritation test

Eye

Species: rabbit Result: non-irritant Method: Primary eye irritation test

#### Sensitization

Assessment of sensitization: The product has not been tested. The statement has been derived from the properties of the individual components. There is no evidence of a skin-sensitizing potential.

Information on: Abamectin Guinea pig maximization test Species: guinea pig Result: Non-sensitizing. Method: OECD Guideline 406

\_\_\_\_\_

## Chronic Toxicity/Effects

#### Repeated dose toxicity

Assessment of repeated dose toxicity: The product has not been tested. The statement has been derived from the properties of the individual components. A health hazard potential can essentially be excluded based on the low concentration of the component in the product.

#### Information on: Abamectin

Assessment of repeated dose toxicity: Repeated inhalation exposure to small quantities may affect certain organs.

Repeated oral exposure to small quantities may affect certain organs.

-----

#### Genetic toxicity

Assessment of mutagenicity: The product has not been tested. The statement has been derived from the properties of the individual components. Mutagenicity tests revealed no genotoxic potential.

## **Carcinogenicity**

Assessment of carcinogenicity: The product has not been tested. The statement has been derived from the properties of the individual components. The results of various animal studies gave no indication of a carcinogenic effect.

#### Reproductive toxicity

Assessment of reproduction toxicity: The product has not been tested. The statement has been derived from the properties of the individual components. The results of animal studies gave no indication of a fertility impairing effect.

Revision date : 2016/05/04 Version: 3.0

#### **Teratogenicity**

Assessment of teratogenicity: The product has not been tested. The statement has been derived from the properties of the individual components. A health hazard potential can essentially be excluded based on the low concentration of the component in the product.

Information on: Abamectin Assessment of teratogenicity: Indications of possible developmental toxicity/teratogenicity were seen in animal studies. Causes developmental effects in animals at high, maternally toxic doses.

## Symptoms of Exposure

No significant reaction of the human body to the product known.

# **12. Ecological Information**

### Toxicity

Aquatic toxicity Assessment of aquatic toxicity: Very toxic (acute effect) to fish. Very toxic (acute effect) to aquatic invertebrates. Acutely toxic for aquatic plants.

#### Toxicity to fish

Information on: Abamectin LC50 (96 h) 0.0036 mg/l, Oncorhynchus mykiss

#### Aquatic invertebrates

Information on: Abamectin EC50 (48 h) 0.00034 mg/l, Daphnia magna

Aquatic plants

Information on: Abamectin EC50 (72 h) > 0.00159 mg/l, Pseudokirchneriella subcapitata

#### Persistence and degradability

<u>Assessment biodegradation and elimination (H2O)</u> The product has not been tested. The statement has been derived from the properties of the individual components.

#### **Bioaccumulative potential**

<u>Assessment bioaccumulation potential</u> The product has not been tested. The statement has been derived from the properties of the individual components.

Assessment bioaccumulation potential

Revision date : 2016/05/04 Version: 3.0

#### Information on: Abamectin

Accumulation in organisms is not to be expected.

## Mobility in soil

<u>Assessment transport between environmental compartments</u> The product has not been tested. The statement has been derived from the properties of the individual components.

Information on: Abamectin

Following exposure to soil, adsorption to solid soil particles is probable, therefore contamination of groundwater is not expected.

# 13. Disposal considerations

#### Waste disposal of substance:

See product label for disposal and recycling instructions.

#### **Container disposal:**

Contaminated packaging should be emptied as far as possible and disposed of in the same manner as the substance/product.

# 14. Transport Information

Land transport TDG	
	Not classified as a dangerous good under transport regulations
<b>Sea transport</b> IMDG	
Hazard class: Packing group: ID number: Hazard label: Marine pollutant: Proper shipping name:	9 III UN 3077 9, EHSM YES ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S. (contains ABAMECTIN)
Air transport IATA/ICAO	
Hazard class: Packing group: ID number: Hazard label: Proper shipping name:	9 III UN 3077 9, EHSM ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S. (contains ABAMECTIN)

Revision date : 2016/05/04 Version: 3.0

# **15. Regulatory Information**

### **Federal Regulations**

Registration status:

Chemical DSL, CA released; restriction on quantity / not listed

Crop Protection DSL, CA released / exempt

#### According to Controlled Products Regulations (CPR) (SOR/88-66)

WHMIS does not apply to this product.

## **16. Other Information**

#### SDS Prepared by:

BASF NA Product Regulations SDS Prepared on: 2016/05/04

We support worldwide Responsible Care® initiatives. We value the health and safety of our employees, customers, suppliers and neighbors, and the protection of the environment. Our commitment to Responsible Care is integral to conducting our business and operating our facilities in a safe and environmentally responsible fashion, supporting our customers and suppliers in ensuring the safe and environmentally sound handling of our products, and minimizing the impact of our operations on society and the environment during production, storage, transport, use and disposal of our products.
